

Polylino

Bringing the magic of storytime to every child

Carefully selected books

- Our virtual library has been made in collaboration with children's literature experts.
- The books are by local and international publishers for educational purposes.
- Books are well-known by educators and are read by professional narrators with storytelling skills.
- Children can select from books that can broaden their reading skills and vocabulary.
- Books vary by ages, categories and themes and reflect diverse cultures and groups.
- Our library is continuously growing.

Educator guide

- An educator guide, written by our children's literature expert, Dr. Ann Neely, is included with our service.
- This guide contains knowledge and ideas on child development, emergent literacy, language skills, and how to create a successful reading environment for your children.

Books read in 60+ languages

- We offer a growing selection of books that are read in over 60 languages to support multilingualism and ESL students.
- The majority of books are read in English.
- The languages in audio include: Punjabi, Mandarin, French, Spanish, German, Swedish, Dari, Japanese, and more.
- All books are read by native speakers.
- We continuously update our service with new languages on a rolling basis.

Easy account management

- User-friendly service available on Apple and Android devices.
- Easy to use self-serviced account management under the administrative tool.
- Account synchronization between educators.
- Easy set-up for all your educators in your institution.

Customer support

- Market-leading customer service who are ready to support our users every step of the way.
- Free training with the aim of developing and inspiring educators.
- An academy website with self-serve videos, tutorials, printable documents, and guides.
- Free education seminars and webinars with supportive, informative and international network of like-minded teachers and experts.

Add-on: Home Access

- As an add-on to Polylino, Home Access allows parents to read and listen to books at home with their children.
- Create QR codes for specific reading material and bookshelves for parents.

In App Features

- Auto-play/turn pages automatically.
- Child-mode.
